

## 1.5 Hardware

### Mobile data collection: smartphones

#### When planning to use OpenDataKit:

Most any Android smartphone will do, as long as it has a relatively modern Android version (4.1+).

#### When planning to use OpenMapKit:

To enable OpenMapKit to run fluently and be able to handle larger background maps (in 'mbtiles' format) and OSM data, please make sure that phones have: \* At least 1.5, but preferably 2 GB of RAM \* Preferably 16 GB of storage \* A modern Android version (6.0+)

Furthermore, the following are recommended: \* A 5" screen for usability \* A decently sized battery. For extended usage, it may be necessary to have battery packs \* Make sure to have enough charging options, such as car chargers and extension cords

The following phones/models have been verified to work well on various projects:

#### Smartphones:

- Tecno Camon C9 (2 GB RAM)
- Tecno L9 (2 GB RAM, 16 GB storage)
- Huawei Y5 (2017) and Huawei Y6 Pro (2 GB RAM, 16 GB storage)
- Sony Experia L1 (2 GB RAM, 16 GB storage)
- Motorola Moto G5 (2 GB RAM, 16 GB storage)

#### Tablets:

- Samsung Tab A (SM-T285, 7", 2016) (1.5 GB RAM, 8GB storage)

**Considerations for Hardware Management in Mapping Activities** \* Create and have all mapping participants sign an agreement for the responsibility and liability of devices \* Create an equipment sign out log
